The following is a list of additional treatments/tests that can be added on to your pet's procedure. Please check any and all that you would like to have done while your pet is here.

- I. **Pre-Anesthetic Bloodwork:** Our greatest concern is the health and well being of your pet. Pre-existing conditions not evident during previous examinations may increase anesthetic risk. We recommend all patients undergoing anesthesia/sedation have the appropriate laboratory testing. **All pets 8 years old and up are required to have this testing prior to anesthesia/sedation.**

Please check one of the following:

- Profile 2: Healthy patients 2-7 years of age (\$101.00)

- My pet is less than 8 years old and I DECLINE the above laboratory testing

- II. **IV Fluids/Catheter:** All patients undergoing anesthesia are recommended to have an intravenous catheter placed to allow for administration of fluids to help support blood pressure and to facilitate emergency treatment if possible. Cost for IV Fluids/Catheter is: \$49.00
